

Introducing Lender Connect

Lender Connect is a new collection of MarksmanLMP widgets that can easily be placed on your website. You'll be able to attract more borrowers and keep their interest in services your company offers. Since all APIs are seamlessly integrated into your Marksman account, the amount of time spent closing loans decreases and your company's overall productivity increases. Look smart and make a great first impression with Lender Connect.

- **Calculator Widgets:** Consumers visit your site for a reason: to get more information. Make sure you're providing customized service by providing intuitive information. Grab the attention of potential borrowers instantly with these easy-to-use calculators.
 - How much can I borrow? The number one burning question in every borrower's mind. Demonstrate to borrowers within seconds the loan amount they'll be able to manage.
 - Loan Amortization: Show your customers how they'll need to plan over the long term for loan payments.
- **Market Snapshot:** Show consumers your company's daily rates and programs on a handy plug and lay rate grid. You pick the programs you want to highlight.
- **Consumer Connect Access:** Invite consumers to the Consumer Connect so applicants can complete an entire 1003 application. From the consumer connect, borrowers can research other real estate service providers, retrieve your company rates and access critical loan documents such as pre-approval letters.
- **Rate Look-Up:** Allow consumers to instantly pull rate data for loan programs right on your website. Rate data is pulled from your Marksman account and prices are displayed to consumers.
- **Rate Tracker:** Just like the RateTracker through Marksman, this tool allows consumers the opportunity to pull rates and then setup rate alerts so they can receive rates from you on their own terms. Potential borrowers simply select the rate, the program and how often they'd like to receive rate notifications.
- **Mini Marketplace:** Like the Marksman Marketplace, but eliminating all the other lender competition – showcase YOUR company's rates. This dynamic widget lets consumers access rates based off their FICO, loan amount, LTV and several other criteria to retrieve instant rate quotes.
- **Web Applications:** Get more detailed information from your borrowers directly from your website. All information is automatically populated into your Marksman account.
 - Short Form App: Gather more information on your borrower's loan scenario so you can make more informed decisions.
 - Long Form App: Start to pre-qualify borrowers and give them even more detailed loan options by getting additional information.

Today's Rates
